The slim ATX Tower – That it is possible to offer a state-of-the-art and technically advanced ATX Tower at a highly competitive cost has been proven beyond every reasonable doubt by the new **UC-03B-OP** chassis from CHIEFTEC.

The Tower, not being overloaded with frills and uncalled-for features, sets a new accent in the ATX Tower without appearing bulky. On the interior, the chassis offers enough space for an ATX board of the latest generation and a standard PS II type PSU. The cooling concept is well thought through and can be optionally fitted with two 60mm and/or 120mm fans respectively.
